Backend: Node.js, Express.js, Knex.js, SQL, PostgreSQL, Docker, Python, Git CLI, GitHub, Heroku, Netlify, Vercel

PROJECTS

Sauti African Market — Full Stack Developer

[PROJECT LINK](#)

- Built SQLite3 database with tables to handle e-commerce style schema; utilized Express.js framework to establish routes for data retrieval from front-end site
- Implemented authentication and role-authorization to distinguish customers from sellers using bcrypt.js
- Deployed entire backend to heroku with PostgreSQL database for increased efficiency

Water My Plants — Full Stack Developer

[PROJECT LINK](#)

- Delivered state variables to front end components using Redux framework
- Hashed sensitive user information using bcrypt.js and delivered to backend with JSON Web Tokens (jwt). Built React.jsx components for use in displaying user-submitted information

Co-Make App — Full Stack Developer

[PROJECT LINK](#)

- Devised front-end design model and executed based on agreed upon wireframe
- Fabricated forms for user submission complete with Yup.js validation and assembled form and display components all using React framework

Med-Cabinet — Full Stack Developer

[PROJECT LINK](#)

- Designed landing page, including custom SVG artifact for use with React app
- Hosted site on Netlify Cloud server

EXPERIENCE

Scribble Stadium — Technical Project Manager, *Remote*

AUGUST 2021 - OCTOBER 2021

- Coordinated team development at a high level, pulling tickets from a backlog to scope each sprint
- Led the sprint planning and sprint review meetings for a remote, 11-person team
- Unblocked blockers by deploying team members, researching solutions, involving relevant Labs staff
- Pre-screened pull requests; worked with QA Engineers and team members and ensured active participation

Melanated People, Inc. — Full-Stack Developer Intern, *Remote*

MAY 2021 - AUGUST 2021

- Created Google translate widget in PHP for use on website to enable cross-community discussion
- Advised on app & web roadmap, taking new & valuable technologies into consideration for site-wide upgrade

GoWireless, Inc. — Wireless Tech. Consultant, *Pensacola, FL*

AUGUST 2020 - FEBRUARY 2021

- Surpassed monthly sales goals by 84% on average by matching customer needs to all of the latest offerings
- Diagnosed device functionality errors when possible to build excellent customer rapport, averaging a 9.5/10 customer satisfaction score during tenure

Alorica — Technical Support Specialist, *Pensacola, FL*

APRIL 2019 - AUGUST 2020

- Analyzed caller accounts, including billing statements and cellular usage reports to solve tech support issues
- Managed several personal statistics (call time, customer satisfaction, etc) to achieve exemplary recognitions

Waitr, Inc. — Regional Business Development Manager, *Florida*

JUNE 2018 - JANUARY 2019

- Successfully registered over 36 new restaurants on a monthly basis to integrate Waitr's food delivery service into their respective restaurant operations
- Scheduled menu photoshoots, and served as liaison from restaurant owners and drivers to the app development team via Slack to report app functionality issues, and soliciting product feedback

EDUCATION

Lambda School — Full Stack Web Development, *Remote*

APRIL 2020 - OCTOBER 2021

[View Certificate](#)
