EXPERIENCE

Symmetry Software, Gusto — *Software Support Engineer* November 2024 - Present

• **Client Support:** Developed AI-integrated client support workflow & toolkit for myself & team. This increased the number of tickets solved/ month & decreased overall ticket resolution time

• **AI Change Champion:** Nominated as 1/7 company-wide "AI Change Champions". Introduced and demo'd new tools & methodologies to colleagues to help integrate AI in day-to-day work

• **Gusto AI Hackathon**: Contributed front-end styling, RAG data, and system prompt refinement to an LLM-based bot POC designed to assist clients with Symmetry Tax Engine system log analysis and guide new application implementations. Launched as 'Symmetry Tax Logic' to clients 08/25. Performed RLHF for product after release

• **Symmetry Hackathon:** Won hackathon with 'Symmetry Glance', a billable endpoints usage dashboard reimagined as a conversational LLM capable of fetching client data, analysis and rendering charts for data visualization.

Cisco Systems, Inc., Cisco Secure — *Software Engineer* November 2022 - April 2024

• **Built Automations:** Developed a Python CLI for user management, automating group membership sync across Active Directory, GitHub, Jira, & Webex.

• **Improved Software Architecture:** Proposed a more efficient architecture for Cisco Security products through a Micro-frontend React application proof-of-concept.

• **Enhanced Developer Productivity:** Streamlined onboarding for internal UI developers by simplifying the React/Typescript design system documentation.

• **Increased Team Efficiency:** Supported the platform engineering team by triaging customer and internal user issues related to Cisco Security Cloud Sign On.

Cisco Systems, Inc., Webex — *Software Engineer* February 2022 - November 2022

• **Enhanced Developer Experience:** Contributed sample code to the WebexSamples GitHub repository and technical blogs to developer.webex.com , improving developer understanding of the Webex REST API.

SDKs and Webex REST API through engaging blog posts.

• **Created Educational Resources:** Developed video walkthroughs and explainer videos for new Webex features, expanding the Webex Developer Platform video collection.

• **Built Innovative Tools:** Constructed a Webex Chat Bot to fetch cryptocurrency prices and hosted a public webinar showcasing its development process.

Scribble Stadium — *Technical Project Manager* 2021

•Led agile development team, managed backlog, facilitated collaboration, and ensured quality control.

EDUCATION

Bloom Institute of Technology, Remote | *Full Stack Web*

April 2020 - October 2021

An 18-month coding bootcamp covering Full Stack Web Development and Computer Science fundamentals. View Certificate
